

Eberspächer
Approved Dealer

Here at HJ Specialist Vehicles we are proud to now be able to offer our customers a comprehensive range of products from Eberspächer, this includes Heating systems, refrigeration units, air conditioning, battery management systems for motorhomes and commercial vehicles as well as many more amazing products.

We specialize in the supply and installation of equipment into all makes and models of vehicles.

Vehicle Air & Water Heating

AIRTRONIC ADVANTAGES

- Power setting for direct fast heating
- Automatic continuous interior temperature control
- Quiet operation
- Low fuel and electricity consumption
- Space saving
- Prevents condensation forming internally

HYDRONIC ADVANTAGES

- Hot water and heat at all times
- Prevents condensation forming internally
- Engine preheat – less wear and tear and lower fuel use
- Space saving
- Quiet operation
- Low fuel and electricity consumption

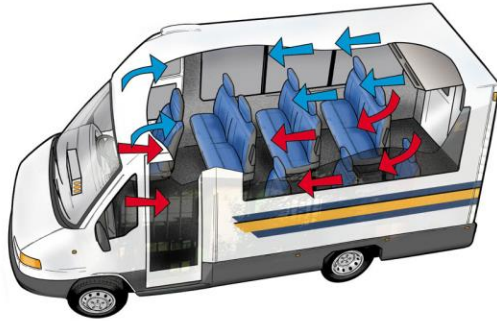

Note - Airtonic & Hydronic would be placed side by side

Air Conditioning

Why Choose an Eberspächer System?

- Cool fresh air on warm days.
- Warm dry air on humid wet days.
- Clear mist free windows.
- Reduced intake of pollen and pollutants.
- Reduced noise and increased security by driving with windows closed.
- Systems can also be configured with additional rear mounted evaporator to provide cool air to rear passenger compartment.

Handiwash & Miniwash

Handiwash Fully automatic units are available.

Water capacity – 8.5 litres	Water level sight glass
Hot and Cold water and taps	Low Power consumption
10 Amps @ 12 Volt	7.2 Amps @ 24 Volt

Miniwash Fully automatic units are available.

Water capacity – 6.0 litres	Water level sight glass
Hot water and taps only	Low Power consumption
9.6 Amps @ 12 Volt	7.2 Amps @ 24 Volt

For anyone whose work brings them into contact with hazardous substances, or unhygienic conditions, they should be considered a necessity.

Extensively used by major companies, Eberspächer handwash units can assist you in meeting occupational health and safety requirements.

Easy Installation

Unit can be easily mounted to any vehicle surface and wired to a 12 volt power source. 24 volt systems are also available.

Low Power, Heavy Duty Heater Element

Using high corrosion resistant materials and state of the art electronics, the heater element thermostatically controls water temperature to 60 degrees Centigrade. The system is also protected by a thermal overload safety device.

Thermoline

At low temperatures, diesel fuel precipitates paraffin crystals that are normally suspended in the fluid. As their concentration increases, the fuel filter will clog and ultimately the engine will stall.

One thing is certain, once the paraffin crystals have formed they can only be cleared by the addition of heat.

The answer to this problem is **ThermoLine**, a diesel fuel pre-heating system that can be inserted into the fuel line to melt the paraffin crystals before they can reach the primary filter.

ThermoLine

- Prevents diesel waxing.
- Saves on fuel additives.
- Reduces fuel costs.
- Quickly pays for itself.

Refrigeration Boxes

Manufactured in Italy to the highest of standards, the insulated boxes are self contained units which include the compressor and condenser within the box.

Easily installed within a vehicle, requiring only a 12v / 24v connection, they are also equipped with a 110v / 230v capability.

The units range from the smaller **22 and 32 litre** models, to the larger **56 and 82 litre**, and to the **140 and 330 litre** models. With temperature capability from **-24 degrees Centigrade to +40 degrees Centigrade**, they are available as chill only, chill / heat and chill / freeze.

They are ATP approved and equipped with a digital temperature controller to allow easy setting of the required internal temperature and control of the true internal temperature.

Applications Include

- Pharmaceutical.
- Medical.
- Sampling of blood, water, etc.
- Plus many other applications within the food industry.
